PROFILE

Web developer with a strong background in key technologies. I create modern and high-performance websites for my clients. I excel in advanced frameworks such as Next.js, React, and Vite.js, enabling me to develop responsive, fast, and user-friendly web applications. I optimize websites for search engines, ensuring my clients gain better online visibility and attract more qualified traffic. My expertise in responsive design ensures the websites I create adapt seamlessly to all devices, delivering a smooth and consistent user experience across desktops, tablets, and smartphones.

SKILLS

Critical thinking Programming
Responsive Website
Website Maintenance and Support
SEO Optimisation
Git/Github
React Vite Nextjs
HTML CSS Javascript/Typescript
Sass TailwindCSS Postgres/Prisma
Supabase Next-Auth

LATEST PROJECTS

IP Address Tracker

An responsive IP address Tracker web app that track the user's location and show informations about your internet provider. On page load it shows informations about the user but, user will be able to enter an IP Address and search for it. It support IPv4 and IPv6 and has a map included using the Leafletjs library. Feel free to check it out at <https://iptracker.ezenardr.dev>. Built with React and Vite

Blog With admin Panel

Built with Nextjs, I implemented and user-friendly design ensuring a seamless experience across devices. Integrated authentication and user and admin roles to enable secure authorship and moderation of protected routes. Employed SEO best practices to optimize content visibility and improve search engine ranking. Leveraged version control with Git to track changes and collaborate effectively with a remote team. For this project I used along Nextjs, Prisma/postgreSQL, Next-auth, Supabase and Typescript. Building the blog website allowed me to deepen my understanding of full-stack web development, database design, and user authentication. It provided practical experience in deploying web applications and refining user experiences. The project also enhanced my problem-solving skills as I addressed challenges related to data organization and site performance. By highlighting your project in this manner, you effectively communicate not only the technical aspects of your work but also the practical skills, problem-solving abilities, and technologies you gained experience with. This demonstrates your competency as a web developer and shows potential employers how you've applied your skills to real-world projects. Check it out at <https://blog.quimonteabord.com> and the Home page at <https://www.quimonteabord.com>

REST Countries API

Designed and developed an interactive web application that leverages the REST Countries API to provide comprehensive information about countries worldwide. Built with nextjs and TailwindCSS, this project showcases my proficiency in front-end technologies, API integration, and creating user-friendly interfaces. Integrated the REST Countries API to fetch and display real-time data, including country details, population, languages, and more. Implemented advanced search and filtering functionalities, allowing users to easily find specific countries or regions. Creating the REST Countries Information App enhanced my proficiency in working with APIs, handling asynchronous data fetching, and integrating third-party libraries for advanced features. The project also provided insights into data visualization and user-centric design principles, contributing to my abilities in building engaging web applications. Feel free to check it out at <https://restcountries.ezenardr.dev>

EDUCATION

Jonas Schmedtmann Html and Css course -Best Seller

UDEMY

I learnt the fundamental building blocks of web development. HTML and CSS are two core technologies used to create and style web pages.
